Abstract

Technology is an essential part of foreign language teaching. As educators, we use a wide range of technology resources for a variety of pedagogical purposes to help students become successful 21st-century learners. The purpose of this presentation is to provide teachers with fresh new ideas on how they can incorporate applications, tools, and mobile devices into their lessons. We will be providing attendees with a hands-on, in-depth look at how we can use the following applications and devices to create the optimal learning experience for our English Language Learners.

- Plickers-Strategies in Motion
- Voicethread - Deconstructed
- Mobile Devices-Scavenger Hunts- Google Documents

We encourage ALL attendees to bring their laptops or notebooks since we will be creating an activity with one of the applications. Additionally, teachers can discuss any technical or stylistic challenges they may be facing when creating activities with these applications.

Biography

Angela McCloskey has been an English teacher in South Korean public schools for the last three years serving in the EPIK and GEPIK programs. She is currently working towards her masters in Education focusing on Globalization of Education. Angela enjoys incorporating her background in media arts and communication into her lessons and activities creating a rich and meaningful learning environment for her students.
